To dispel this notion, the authors created a program that makes college-level physics attainable to average high school students. Additionally, its distinctive concept-building approach allows high performing student to flourish. Regardless of experience, all physics teachers can confidently prepare students for success with this product. The unique program design also makes it ideal for the home-schooled student. This program has proven, through field-testing, that upon successful completion, students are rewarded with genuine conceptual understanding, a real sense of accomplishment, and the tangible benefit of college credit. All tests are comprehensive and include multiple choice and free response sections. The tests continuously increase in difficulty, building to AP-level rigor. The scoring rubrics and alternate forms of each test allow teachers and students to diagnose weaknesses and focus learning. The program also includes a set of ten descriptive physics questions after every fifth lesson, which promotes thought and expose misconceptions, while requiring consideration of concepts from a qualitative and conceptual perspective. The Teacher Resource CD contains detailed keys...
