Reviews

This book might be really worth a read, and superior to other. This really is for all who statte there had not been a really worth studying. I am just happy to tell you that this is basically the very best pdf i actually have read through during my very own lifestyle and may be he best ebook for actually.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 78 pages. Original publisher: Reston, Va. : U. S. Dept. of the Interior, U. S. Geological Survey ; Denver, CO : Branch of Information Services, distributor, 2002. LC Number: GB1015 . T28 2001 OCLC Number: ocm49055782 Subject: Groundwater -- United States -- Measurement. Excerpt: . . . ESSENTIAL COMPONENTS OF WATER-LEVEL MONITORING PROGRAMS wells, (2) determination of the frequency of water-Before discussing the uses and importance level measurements, (3) implementation of quality of long-term water-level data, it is useful to review essential components of a water-level monitoring assurance, and (4) establishment of effective practices for data reporting. program. These include: (1) selection of observation Selection of Observation Wells All water-level monitoring programs depend such as stream discharge or stage, are useful in on the operation of a network of observation examining the interaction between ground water wells - wells selected expressly for the collection of and surface water. Meteorological and streamflow water-level data in one or more specified aquifers. data commonly are available from other sources; Decisions made about the number and locations of but if not, some monitoring of variables such as observation wells are crucial to any water-level data streamflow and precipitation may be needed to collection program. Ideally, the wells chosen for an supplement the water-level data, particularly in observation well network will provide data represen-remote areas or in small watersheds. In addition, tative of various topographic, geologic, climatic, and water-use data, such as pumping rates and volumes land-use environments. Decisions about the areal of pumped water, can greatly enhance the interpre-distribution and depth of completion of observation tation of trends observed in water levels and explain wells also should consider the physical boundaries changes in the...
