

The Interaction of Compilation Technology and Computer Architecture

Filesize: 5.09 MB

Reviews

A brand new e book with a brand new standpoint. I have read through and that i am certain that i am going to gonna go through again once more in the future. Its been developed in an remarkably simple way in fact it is merely right after i finished reading through this book in which basically modified me, modify the way in my opinion.

(Prof. Llewellyn Thiel)

THE INTERACTION OF COMPILATION TECHNOLOGY AND COMPUTER ARCHITECTURE

Springer Mai 1994, 1994. Buch. Book Condition: Neu. 235x155x22 mm. This item is printed on demand - Print on Demand Neuware - In brief summary, the following results were presented in this work: - A linear time approach was developed to find register requirements for any specified CS schedule or filled MRT. - An algorithm was developed for finding register requirements for any kernel that has a dependence graph that is acyclic and has no data reuse on machines with depth independent instruction templates. - We presented an efficient method of estimating register requirements as a function of pipeline depth. - We developed a technique for efficiently finding bounds on register requirements as a function of pipeline depth. - Presented experimental data to verify these new techniques. - discussed some interesting design points for register file size on a number of different architectures.
